## **Carolina Sweepers, LLC: *Providing State-of-the-Art Services***

*Carolina Sweepers, LLC monitors and analyzes nightly sweeping performance with Global Positioning Satellite (GPS) systems mounted on-board each parking lot sweeper.*

### **We both receive many benefits from our operation of GPS-equipped sweepers. Routine analysis and available information include:**

1. Nightly arrival and departure times for each shopping center.
  - a. This feature allows us to be sure adequate time is allotted for thorough sweeping of your property.
2. Sweeper speeds while on the property.
  - a. We are able to ensure proper speeds are followed for optimum pickup performance.
  - b. Monitoring provides ongoing compliance with our company safety program.
3. Driver's side door opening and closing.
  - a. This shows when driver leaves sweeper to handpick larger items, glass objects, etc., as well as for handpicking landscape beds.
4. Gutter broom activation and deactivation.
  - a. Onsite monitoring ensures thorough cleaning of gutters and drive lanes.
5. Sweeper path over the property.
  - a. To ensure front, sides and rear of property are adequately swept.
  - b. An 'electronic bread crumb trail' details the sweeper's path across each property.
6. Sweeper stops/durations at all locations at each shopping center.
  - a. This ensures work proceeds diligently and responsibly so that all scheduled areas are serviced.
  - b. Provides oversight to ensure that special services are provided, e.g., all trash cans are relined.

*Carolina Sweepers, LLC consistently maintains dependable, exceptional service by combining our onboard sweeper GPS system with weekly on-site inspections. Our professionally designed system allows us to meet — and exceed — the standards that are desired by our customers and required by our management team.*

*"Well done is better than well said." —Benjamin Franklin*
